<b>I. General Appearance</b>					
Color:	pink pale flushed acrocyanosis general cyanosis gray jaundiced mottled Mec. Stained foul odor				
Cry:	strong, lusty weak no cry hoarse high pitched				
Activity:	active, spontaneous hyperactive responses to stimulation slow response to stimulation no response to stimulation flaccid jittery				
Reflexes:	no abnormality notes moro root grasp sucking				
Skin:	smooth dry, peeling warm, dry cold, clammy cold, dry cool, extremities parchment like perspiring edema lanugo mec stained petechaie				
Birthmark:	no yes location: _____ description: _____				
Vernix:	none LT. MOD heavy				
<b>II. Head</b>					
Head & Face:	symmetrical asymmetrical caput molding bruising lacerations forcep marks cranial tabes cephalohematoma widely sep. sutures				
Fontanelles:	soft flat small large bulging depressed pulsating				
Eyes:	no abnormality noted opacities drainage swollen trauma other				
Ears:	no abnormality noted low set abnormal skin tags deep sinuses				
Mouth:	no abnormality noted circumoral cyanosis protruding tongue cleft lip cleft palate teeth cysts				
Nose:	nasal congestion nares patent nasal flaring symmetrical				
Neck:	no abnormality noted nares patent webbing mass sinus fat pad clavicle asymmetrical right left				
<b>III. Chest</b>					
Breath Sounds:	clear/equal crackles shallow coarse				
Respirations:	unlabored grunting nasal flaring irregular tachypnea 80 bradypnea 30				
Retractions:	none subcostal substernal intercostal suprasternal				
Shape:	symmetrical asymmetrical barreled				
Breast:	no visible bud visible bud stripled areola breast tissue engorged skin tags				
<b>IV. Heart Sounds</b>					
Murmur	between left nipple and sternum	to right of sternum	to left of nipple	faint, distant	Bounding
Pulse:	palpable femoral Brachial capillary refill time _____				
<b>V. Body and Extremities:</b>					
Abdomen:	symmetrical asymmetrical scaphoid, sunken distended, soft distended, firm mass, location _____				
Back:	no abnormality noted mongolian spots myelomenigocele sacral dimple skin tags hair tufts				
Umbilical Cord:	no abnormality noted small large pulsating meconium stained oozing umbilical hernia number of vessels _____				
Hands & Arms:	no abnormality noted abnormal shape RT LT no movement RT LT Palmar simian creases				
Legs & Feet:	no abnormality noted extra digits RT LT bruising abnormal shape RT LT positional deformity assym. Gluteal folds sole creases to heal 2/3 hip abduction normal sole creases involving heal 3/3				
Genitalia & Rectum:	no abnormality noted imperforated anus term preterm male female no abnormality noted hypospadias testes: descended undescended bruising edema abnormal
