Vocational Nursing  
Pediatric Assessment Database

System Descriptors	System Descriptors	System Descriptors	System Descriptors
<b>Neurological</b>	Throat/Mouth:	Cough (continued)	Cyanosis (continued)
LOC:	drooling	croupy	(jaundiced)
alert	abn. suck/swallow	productive	petechiae
oriented by age	Nose:	Retractions:	diaper rash
coordination movements	normal	suprasternal	Cyanosis:
normal motor strength	(congested)	intercostal	rash
responds to commands	drainage	substernal	lesions
responds to pain only	(epistaxis)	(grunting)	pruritis
listless	<b>Cardiovascular</b>	(nasal flaring)	other
lethargic	Heart Rate:	<b>Gastrointestinal</b>	Texture/Temp:
irritable	regular	Abdomen:	soft
comatose	irregular	soft	dry
uncoordinated movements	bradycardia	flat	warm hot flushed
decreased motor strength	tachycardia	full	parchment-like
Fontanels: FOC	Pulses: Apical/Peripheral	distended	moist
flat/normotensive	full	firm	diaphoretic
bulging	equal	rigid	clammy
depressed	unequal	pain	cool
pulsating	strong	pain (site)	turgor
Pupils	weak	Bowel Sounds	Umbilicus:
equal	thready	present: WNL	dry
reactive	Heart Sounds:	hyperactive	moist
unequal	normal	hypoactive	drainage
fixed	faint	absent	foul odor
dilated	bounding	nausea vomiting	hernia
pin point	murmur	anorexia	(reddened)
<b>EENT</b>	<b>Pulmonary</b>	flatulent	cord intact
Eyes:	Breath Sounds:	incontinent	<b>Musculoskeletal</b>
symmetry asym./sym.	clear	other	ROM:
tearing	equal	<b>Genitourinary</b>	normal
stary	diminished R L	Urinary:	limited
(sunken)	stridor	color conc. mucus	Joint Pain
(edematous)	wheezing	clarity	Muscle Tone:
redness	coarse	odor	isotonic
Mucous Membranes:	other	frequency	hypertonic
moist, pink	Respirations:	urgency	hypotonic
dry	eupnea	dysuria	flaccid
reddened	tachypnea	incontinent	nuchal rigidity
discharge	bradypnea	distention	opisthotonic
Ears:	periodic	<b>Integumentary</b>	<b>Pain</b>
normal	apnea	Color:	Key:
pulling/pain R L	dyspnea	pink nailbeds	= present
drainage R L	Cough:	pale	RL = circle right or left
Throat/Mouth:	absent	mottled	( ) = indicate severity
moist, pink	dry	flushed	1 = mild
dry	moist	Cyanosis:	2 = moderate
plaque	frequent	generalized	3 = severe
bleeding	congested	circumoral	CDI = Clean, dry & intact
other		acrocyanosis	List and describe ostomies, tubes, drains, and dressings below in notes
Notes:
