

Vascular Technology Enhanced Skills Certificate

The Echocardiography and Vascular Technology Programs provide the training and skills needed to enter this in-demand field in the medical community. Both echocardiography and vascular technology are specialized skills that involve examining a patient's heart through ultrasonography. By partnering with local hospitals, these programs provide hands-on training with small class sizes that offer students the one-on-one training they need to be successful.

Year 1: Semester 1

Course	Semester Credit Hours
DSVT 1300 Principles of Vascular Technology	3
DSVT 2200 Vascular Technology Applications	2
DSVT 2461 Clinical+	4
Total	9

Year 1: Semester 2

Course	Semester Credit Hours
DSVT 2335 Advanced Non-Invasive Vascular Technology	3
Total	3

+ Capstone Experience
