

BEHAVIORAL SCIENCE ASSOCIATE OF ARTS

The Associate of Arts in Behavioral Science prepares students for a wide variety of careers in which an understanding of human thinking and behavior, social dynamics and community needs are essential. Students of psychology study the factors that motivate individuals and influence human behavior. Sociology is the study of the many ways in which social and cultural situations shape human behavior. Social workers are dedicated to strengthening the community by identifying need and matching people with available resources, services, and opportunities. A Behavioral Science degree hones students' ability to critically evaluate information and utilize data to understand and address problems in the home, workplace, and community.

Submit Apply Texas application, submit FAFSA, request official transcripts, submit test scores and provide proof of Meningitis shot.
